

Solution key capabilities:

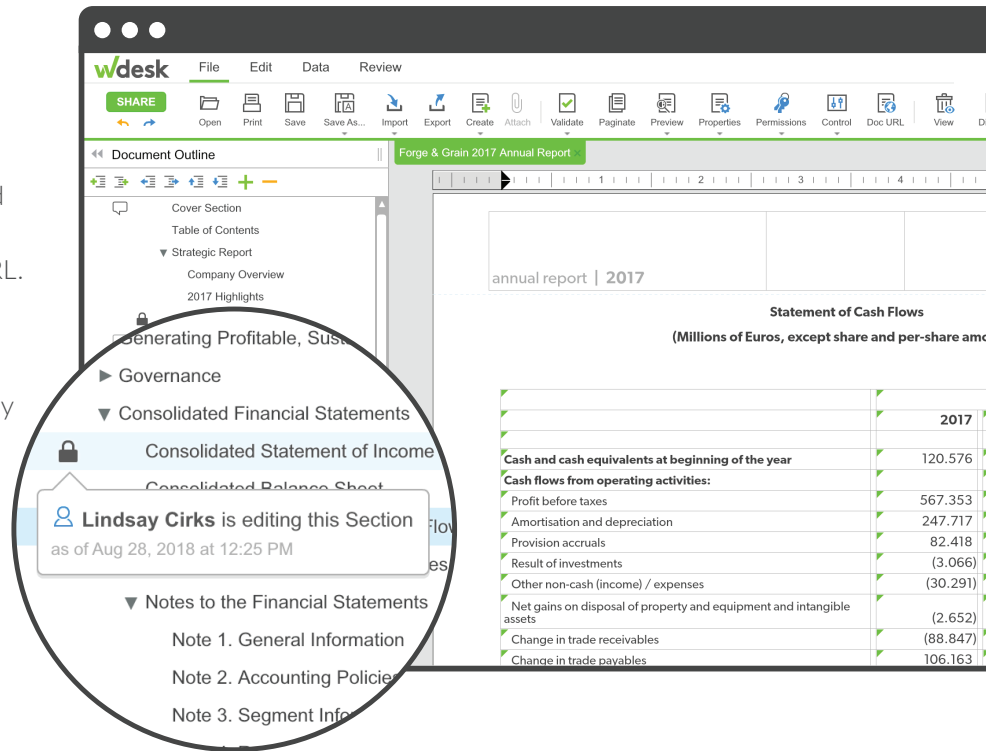

- Inline XBRL
- XHTML output
- Customized iXBRL tagging
- Data governance

ESEF Reporting

As the global leader in cloud financial reporting, Workiva delivers a modern reporting solution designed to optimise and expedite compliance with ESMA's 2020 mandate for ESEF reporting, including iXBRL.

Wdesk, the Workiva cloud platform, streamlines reporting and links data across various reports to ensure the highest quality XHTML output. Delivered in a flexible, scalable and secure cloud environment, the platform ensures data consistency.

Wdesk is used by more than 3,000 organisations worldwide to increase productivity and drive better decision-making.

Risk mitigation

Ensure data accuracy and minimise risk by managing all work through a secure cloud platform. Track requests, responses and approvals in a real-time dashboard.

Designed reporting

Create reports and migrate them in the format most applicable to your organisation's needs, including XHTML.

Simplified iXBRL tagging

Accurately and quickly meet the XBRL and iXBRL tagging requirements your organisation requires. Work simultaneously with internal and external teams on financial reporting, footnotes, commentary and document amendments.

Central repository for reporting

Consolidating all reporting information on one platform provides you with confidence in the accuracy of your data. Make last-minute edits to numbers and text, and see those changes flow throughout your documents.

About Workiva

Workiva is a leading provider of enterprise cloud solutions for data collaboration, reporting and compliance. More than 3,000 organisations worldwide, including companies of all sizes, government agencies, and educational institutions, trust our cloud platform to improve productivity, connect data, and gain confidence in their data-driven decisions. For more information about Workiva (NYSE:WK), please visit workiva.co.uk.

Data integration

Structured or unstructured data is easily brought into the platform through document import, data sync and integration with your existing operational and transactional systems. Data can be used and reused, providing a consistent story across all of the work in Wdesk.

Data governance

Connect and link data across the Wdesk platform. When last-minute changes occur to documentation, users can trust that numbers and narrative are instantly updated across all instances without any manual work.

Document management

Everyone has access to the most up-to-date documents. Wdesk eliminates check-out systems, email trails and handwritten notes. More version control means fewer questions and faster results.

Trusted and proven partner

We are not just a vendor. We are your proven partner for success. Join the over 3,000 companies across 120 countries that trust their data to Wdesk.

Permissions and security

Trusted by the world's most sophisticated organisations, Wdesk provides rigorous safeguards and the highest level of security. Manage access and control at all levels—by team, contributor, or even an individual data point.

Simplified data management

Easily create, modify and connect financial and narrative information. Accelerate decision-making with powerful reporting and insights. Provide a consistent story across outputs to auditors, regulators and citizen groups.

I take comfort in knowing that everything is located in one platform and we don't have to worry about losing information.

—**Karen Hayson**, Accounting Manager, Schnitzer Steel Corporation
